Preliminary Amendment §371 of PCT/FR2004/002502 Attorney Docket No. LAV0313156

AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior versions and listings of claims in the application.

Listing of Claims:

- 1. (Currently amended): A system for assisting the regeneration of depollution means (1)—associated with oxidation catalyst-forming means—(2), and integrated in an exhaust line (3)—of a motor vehicle diesel engine—(4), and in which the engine (4)—is associated with common rail means (7)—for feeding fuel to the cylinders of the engine and adapted, at constant torque, to implement a strategy of regeneration by injecting fuel into the cylinders in at least one postinjection, the system being characterized in that it comprises comprising:
- detector means $\frac{(8)}{}$ for detecting a request $\frac{(\text{req.RG})}{}$ for regeneration and thus for postinjection;
- detector means (9) for detecting that the vehicle accelerator pedal is being raised;
- acquisition means $\frac{(11)}{}$ for acquiring the temperature downstream from the catalyst-forming means $\frac{(2)}{}$;
- determination means (8) for determining, on the basis of said temperature, a maximum duration for applying postinjections during a stage in which the engine is returning to idling as a result of the accelerator pedal being raised; and
- cutoff means (7, 8) for immediately cutting off the or each postinjection as soon as the duration of postinjection use has reached the predetermined maximum duration of application.
- 2. (Currently amended): A system according to claim 1, <u>characterized in that wherein</u> the depollution means (1) comprise a particle filter.
- 3. (Currently amended): A system according to claim 1-or-claim 2, characterized in that, wherein the depollution means (1)-comprise

Preliminary Amendment §371 of PCT/FR2004/002502 Attorney Docket No. LAV0313156

a NOx trap.

- 4. (Currently amended): A system according to any preceding claim, characterized in that claim 1, wherein the fuel includes an additive for becoming deposited together with the particles with which it is mixed on the depollution means (1) in order to facilitate regeneration thereof.
- 5. (Currently amended): A system according to any one of claims claim 1 to 3, characterized in that, wherein the fuel includes an additive forming a NOx trap.
- 6. (Currently amended): A system according to any preceding claim, characterized in that 1, wherein the engine is associated with a turbocharger (5, 6).
